# GETTING STARTED

Welcome to Cablelabs' Developer Portal.   Learn how to access the APIs, use the API navigation tool, access and interact with the underlying model and utilize the community forums.

INTERACTING with the API ENTITY MAP

The Entity Map is an interactive tool that allows you to navigate the relationships between entities, view the detailed descriptions and access the documentation directly from the map. Through the entity relationships you will get on understanding of the domain relationships for the underlying data model.

The map provides you with the capabilities to:

View Complete List of Common Entities within Each Domain

Common	Customer	Interaction
Contact	Account	Bill Charge
Email Contact	Customer	Comment
Fax Number	Customer Payment	Comment Collection
Postal Contact	Customer QuoteItem	Customer Bill

Isolate Domains and the Related Entities

Common	Customer	Interaction
	Account	
	Customer	
	Customer Payment	
	Customer QuoteItem	

Access any Entity Definition and Documentation with One Click

Common	Customer	Interaction
Contact	Account	Bill Charge
Email Contact	ℹ ↻	Comment
Fax Number		Comment Collection
Postal Contact		Customer Bill
Telephone Number		Customer BillSpec

Account documentation

Account defines the relationship between the customer and provider with respect to billing, payments, and other financial transactions. The customer account is also used to grant entitlement tokens based on services purchased.
